## Polishing kits for various machines

### Osborn presents new polishing range

(Burgwald). Osborn has developed a new range of polishing products for the DIY market and specialist dealers. The new products are available in kits comprising of polishing buffs and corresponding compounds to be used on angle grinders, variable-speed angle grinders/cordless grinders, power drills and satinising machines. The new range will be available to order from May 2018. A first glimpse of the portfolio can be gained at the Cologne Hardware Fair from 4<sup>th</sup> - 7<sup>th</sup> March 2018.

While the primary focus for Osborn polishing tools and compounds is heavy industrial applications, this range has been developed with a clear focus on users with infrequent demand for polishing products. Ambitious hobby-workers may use them for home improvement projects, but they are also suitable for small and mid-sized handicraft business. The kits contain everything needed – buffs for cutting, polishing and colouring as well as the corresponding polishing compounds. Much attention has been paid to finding the right mounting for the most common machines in this sector: M14 threads for angle grinders, bores of 10 mm and tapered shanks for power drills or a 19 mm bore with four keyways for satinising machines.

The kits come in clear PET packaging, ideal for presentation at the point of sale in dealer shops. An application guide can be found directly on the package. Polishing, usually a very sophisticated process, becomes more intelligible for everyone.

-2-

As an expert in surface treatment solutions for more than 125 years, Osborn has also included satinising tools in this new range. While a high gloss finish is often desirable, there are areas demanding a more matt finish – from coarse to fine. Abrasive buffs in different grit sizes, abrasive flap wheels and satin finishing rollers are also part of this portfolio.

The products will become available in May 2018. Beforehand a sneak preview is possible at Cologne Hardware Fair from 4<sup>th</sup> - 7<sup>th</sup> March 2018.
