

Osborn is a technology leader and the world's largest manufacturer of tools for mechanical surface treatment solutions. Our core products include technical brushes, polishing tools and compounds as well as grinding tools. We supply our high-quality products to an international clientele from a wide range of industries as well as the wholesale trade.

For our Quality, Safety and Environment Department in Guimarães we are looking for a new team member:

Junior Quality Engineer (m/f/d)

Your Responsibilities:

- Creation and continuous development of the quality management system (ISO 9001)
- Control metrological requirements: equipment's calibration and verification
- Preparation, execution and follow-up of audits (internal and external)
- Creation and processing of QM plans as well as support and monitoring of product quality
- Create, follow and guarantee the accomplishment of the Reach regulation (safety data sheets)
- Train and implement quality tools (5 whys, PDCA, 8D report)
- Ensure compliance with environmental and safety regulations and company policies and identify risks
- Support implementation and maintenance of ISO 14001
- Processing of customer and suppliers' complaints

Who You Are:

- English (spoken & written)
- Degree in Environment
- Occupational Safety, Quality, Industrial Management or other relevant to the position

What We Offer:

- To balance family and career, we create the best conditions with our hybrid working model.
- A performance-related and attractive salary.
- A detailed induction in a motivated matrix team.
- Excellent development opportunities in a globally thriving company.
- Work in a future-proof and international environment.

If you are enthusiastic about this opportunity, send us your complete job application. Contribute yourself and your ideas, we look forward to hearing from you.
