

SEALEZE® for Building Envelope

At **SEALEZE®**, we pride ourselves on our problem-solving product. Our building envelope products are designed to improve the thermal efficiency, reduce pest problems, and improve comfort and safety.

SEALEZE® Heritage

In the 1970s **SEALEZE®** was the inventor and first US manufacturer of “The Original” strip brush for building envelope (weather seal) applications. Since then, we have become the foremost innovator in brush solutions for a broad range of applications, including a dedicated in-house customer service team focused on creating technical solutions for today’s business needs.

Building Envelope covers the following door types and brush applications

- Entry doors
- Overhead doors
- Hangar doors
- Dock doors
- Doors exposed to outside elements

Core Values

- Performance: **SEALEZE®** brushes help eliminate 98.5% of air infiltration.
- Durability: Nylon brushes will last 50 years when installed properly. Results based on 2 million cycles.
- Simplicity: We are making it simple to do business with **SEALEZE®**.

Order Information

- **SEALEZE®** kits come with the brush and holder, attached together, with pre-drilled holes and fasteners in a plastic sleeve for the quick and easy installation.
- Therm-L-Brush with filament 4” long or less is UL approved for use on 3-hour fire doors.
- The best selling Building Envelope products are included in this catalog for easy selection and ordering.
